

During the summer of 2021, we were pleased to have Mattioli Cement Co repave a lengthy section of the main street through our subdivision.

We enjoyed their work style and results. The following are notable.

1. Easy to work with
2. Open to questions and requests for updates whether scheduled or on the spur of the moment
3. Made pedestrian and vehicle traffic protocols to ensure safety for everyone and yet sufficiently flexible when necessary to accommodate unusual situations
4. The contractor's crew members seem to enjoy their work and their boss.
5. Contractor had his employees return to the job site early every Friday morning on Trash Pick-up Day and move residents' trash and recycling bins to the opposite side of their now under-construction roadway and then return on Saturday morning early to return the bins.
6. Willing to consider and to accommodate special requests from the Homeowners Association
